AWARDS, HONORS, AND 'NOTABLES' (CHRONOLOGICAL ORDER OF PAST & PRESENT EXAMPLES):

Dear Professor Scott, Greetings! I would like to take this opportunity to introduce myself as Shikha Garg. I am the Editorial Assistant at CRC Press, Taylor and Francis Group. I am writing to you today to get your valuable feedback and review on a book proposal by Rajiv Misra titled '***LINUX YOURSELF: Concept & Programming (Sunil Singh)'*** that, I received recently. I have the following set of documents for you to look at along with a Referee Report form for you to fill in. **The book proposal form; The Table of Contents; The Preface; The CV of the Author.** Would it be possible for you to give me a review in 2-3 weeks? I would be more than glad if you could give me a review earlier than that though. In thanks I would be happy to offer US$180/ £ 120 worth of books from www.crcpress.com. Please do let me know before going ahead with this review. Kindly wait for a confirmation from me before going forward with it. If you cannot I would be happy to receive any names of people you think suitable to review. I look forward to your reply. Have a wonderful day! Thanks. Regards, Shikha Garg, Editorial Assistant (Mathematics, Physics, and Life Sciences) | CRC Press | Taylor & Francis Group (31July2017)

Dear kscott@trenholmstate.edu, It is my pleasure to inform you that you may qualify for inclusion in the 2017 Professional Who's Who Network. Professional Who's Who is one of the largest communities of accomplished professionals in every industry and profession worldwide. We provide an exclusive on-line networking forum which allows our members to connect with other professionals to achieve personal growth and career opportunities. Membership Division, Who's Who Among Executives and Professionals (23June2017).

Dear Dr. Ken Scott, I'm writing to follow-up my last invitation as below, would you please give me a tentative reply? Thank you very much. I apologize for the inconvenience if the letter disturbed you more than once. We are proud to announce that World Education Day-2017 (WED-2017), with a theme of "Inheritance, Innovation, Cooperation and Development" will be held during September 27-29, 2017 in Dalian, China. On behalf of the organizing committee, we cordially welcome you to be the **chair/speaker** at **Block 1: Educational Leadership Forums** while presenting about **ePortfolios: The Method of Choice for Validation…** If the suggested thematic session is not your current focused core, you may look through the whole sessions and transfer another one that fit your interest (more info about the program is available at http://www.worldeduday.org/programlayout.asp. … Ms. Miranda Liang Organizing Committee of World Education Day-2017 BIT Group Global Ltd. Hi Brandi, Are you going to let everyone know that I resigned and that Ken is now an officer of the Faculty Senate (in case they are wondering why they see Ken's name instead of mine)? Thanks, **Melissa Pickett.** Program Coordinator, Computer Information Systems, Distance Education Coordinator. (2 September 2016)

Dear Ken, Congratulations! You have been selected to present at the 2016 STEM*tech*Conference. Please complete your presenter agreement form and thoroughly review other presenter information using the links provided below. You will receive an email with the date, time, and location of your session(s) by August 5.

Dr. Scott, Whoa!!! This is an awesome writing!! This is exactly what I crave to read. I found a link, in that document, to Clemson University where I can even see what other students are doing to compare and contrast my own e-portfolio work (http://www.clemson.edu/academics/programs/eportfolio/gallery.html). This is exactly why I crave seeing what other students do!! The creativity and ideas that they have with their own e-portfolios are priceless. *I LOVE reading stuff like this!! This is absolutely critical in turning what could be four years of college into what can be not only four years of college but also a job! Dr. Scott, I am not sure you understand how much you have helped me in preparation for a job. The very first time I talked to you, before I enrolled at Amridge, (1) you explained the importance of certifications; then over time (2) you have subsequently introduced me to marketing my skills through an e-portfolio. You have made two of the most major contributions to my education that will increase the return I get on this education at Amridge by at least tenfold. I have not only been able to acquire a certification but also have been able to gravitate towards a complete e-portfolio and am doing both with complete autonomy and continued persistence beyond just a course! (7/13/2016)*

Dear Ken, You are receiving this email because of your past involvement with the Journal of Asynchronous Learning Networks (JALN) or the Journal of Online Learning and Teaching (JOLT). As you are probably aware, these two journals have merged into the *Online Learning* Journal (OLJ), sponsored by the Online Learning Consortium. We are looking for committed scholars who are willing to share their expertise on a newly organized OLJ review board by serving in one of the following ways: **Associate Editor** - works with other associate editors to grow the quality and prestige of the journal; **Assistant Editor** - works with Associate Editors in the review process; **Review Board**

Member - reviews up to 6 article submissions per year; **Ad Hoc Reviewer** - reviews 1-2 article submissions per year; doctoral student, full or part-time faculty/professional with demonstrated interest in the field of online teaching & learning research. (5/20/2016)

2016 Outstanding Work and Service for Faculty Award, Trenholm State Community College 2016 College Retreat, 9 May 2016 (Independent Selection Committee)

Good afternoon Dr. Scott: I would like to nominate you for the 2016 Outstanding Work and Service Award for Faculty. Would you please help me complete the form by inserting information that I may not know about you for each question. Should you have questions regarding my request, please don't hesitate to contact me. Thank you for your help. Arlinda K. Knight (15 March 2016)

Dear Dr. Ken Scott, My name is Robert, and I am the editorial assistant of "Journal of Education and Training Studies (JETS)". I have had an opportunity to read your paper entitled "ePortfolios: The Method of Choice for Validation", and can tell from your work that you are an expert in this field. Therefore, I would like to personally invite you to submit manuscripts to our journal. Journal of Education and Training Studies (ISSN 2324-805X; E-ISSN 2324-8068) is a peer-reviewed, open-access journal, published by Redfame Publishing. JETS publishes in both print and online versions. Best Regards, Robert Smith, Editorial Assistant, Journal of Education and Training Studies. (23 November 2015)

Volunteered to Serve as a Blackboard Exemplary Course Program Reviewer; November, 2015.

Alabama Holocaust Commission, Public Information Committee: Chair: Dr. Ken Scott, Members: Al Benn, Martha Daughdrill, Maury Shevin, Jim Jolly. This committee is responsible for organizing and managing the AHC Website, Facebook page, and other social media outlets. It will coordinate with BHEC and GCCHHRE (and the Education Committee) to keep information updated. It will also promote the activities of the Commission and the two Centers. (October, 2015)

Ken, I hope you are having a great summer and that you have had an opportunity to spend some time with those grandchildren! Would you be willing to serve as the chair of the Newsletter Sub-committee? This is one of two sub-committees that fall beneath the umbrella of Marketing and Communications. The Marketing and Communications Committee has its own chair and committee members. The other sub-committee falling beneath this umbrella is Alumni Marketing (web site/social media). Few people, even those in the marketing field, know how to write in grammatically correct sentences. If you know of anyone else who has this talent, besides yourself, you may add them to the mix if you'd like, but I really need your help if you are willing to give it a try. We'll be doing a quarterly newsletter and an annual report, so there won't be that much to proof/write. Please let me know! Thanks! (July 2015)

Dr. Scott, I am currently in the process of putting together a senior capstone course for a newly-approved English major. I would like to create a course in which the e-portfolio is the capstone, so I read with interest your article in The Teaching Professor in 2012 about the e-portfolio capstone course at Ambridge University. Do you have a syllabus and/or other materials for the course? Do you know of other universities doing something like this? Other sources I should be looking at? I'm finding lots of capstone courses that use portfolios but I want to create a course in which the capstone is the portfolio. Thank you for your time. Regards, Eileen (10June2015; @jwu.edu)

Dr. Scott, My name is Amy Austin. I am a PhD student at Capella University. I found your dissertation to be interesting and would like to use the survey you developed "Student and Faculty Perceptions of College Student Success: Faculty Survey v.2". I would like to use it for my dissertation, but with nursing faculty. I am currently still in my coursework, but wanted to see if I could attain your permission before continuing. I would greatly appreciate any assistance and your permission. Being from Alabama, I would like to also add "War Eagle". Thank you, Amy Austin (06/26/2015)

Dr. Scott and Dr. McCurty, My Daughter has SAT testing on the same Saturday as the commencement ceremony and I don't return from my next TDY until Friday evening, so unfortunately, I won't be able to attend the Graduation Tea or Commencement Ceremony. I was most looking forward to meeting you both face-to-face and thanking you for the support, encouragement and confidence building. I owe much of my academic success to you both. Thank you, -Dan Slater

Congratulations! I am delighted to inform you that the poster session proposal you submitted titled "Simulation Software as a Prime Motivator for Student Engagement**"** was selected as a poster session. The Teaching Professor Technology Conference, 2-4 October 2015, New Orleans, LA.

QEP Assistant Director/ Director of EXPLORE Lab – Dr. Ken Scott, Amridge University (2015-2019)

Hello, Greetings from The Teaching Professor Conference (29-31 May 2015). Congratulations! I am delighted to inform you that the poster session proposal you submitted titled "E-Portfolios: Methodology to Validate and Promote Critical Workforce STEM Skills" was selected as a poster session. If you have a co-presenter(s), please share this information with them.

Hello, The AAC&U Program Committee would like to thank you for proposing the session "E-Portfolios: Methodology to Validate and Promote Critical Workforce STEM Skills" for the 2015 Forum on Digital Learning and E-Portfolios on Saturday January 24, 2015 at the Marriott Marquis in Washington, D.C. We are pleased to accept your session for the E-Portfolio Forum! This year, we are inviting all session proposers to seriously consider turning your presentation into an article for potential publication in the *International Journal of ePortfolio*

Hello, Are you interested in serving on an IRB for Trenholm State? I have been responsible for doing this for the College; however, it may be more appropriate for us to have a committee approach. Let me know what you think. I would like to identify at least additional three folks to serve on this committee to recommend to the President. *Institutional Researchers: We Crunch Data for Breakfast!* Mimi Evelyn Johnson, EdD. (2 September 2014)

I would also like to thank **Dr. Ken Scott** for leading the faculty professional development meeting this past Friday. He did an outstanding job and presented everyone with incredible resources and step by step examples of using rubrics in Blackboard. If you have not had time to watch that presentation, you will want to make sure to do so. All instructional materials can be found in the Faculty Resources Blackboard course in the file folder labeled "July 2014".

Hello Dr. Scott and Dr. Salisbury, I consulted with Dr. Taylor about the possibility of the two of you being added to the Learning Resources Team. She indicated that it was acceptable for the two of you to be added to the team. If it is agreeable, please let me know individually and I will send you the details of our upcoming meeting. Thanks, Terence Sheridan, Head Librarian, Amridge University. (24June2014)

Dear Ken, It is an honor to be selected by your peers to present at the AIR Forum. You earned that honor because of the quality and timeliness of your proposed topic. Thank you for your willingness to share your expertise and scholarship with other AIR members. Will you consider sharing more broadly, your session - *The Impact of Survey Quantity and Quality on Informed Decision-Making*? ... The decision on which sessions to record will be made closer to the Forum, but because *your session is one that we are considering*, we ask that you, on behalf and in agreement with any co-presenters, give us permission to record your session, May 26-30, 2014.

24-Apr-2014: Dear Dr Scott: Ref: ePortfolios: The Method of Choice for Validation, Our reviewers have now considered your revised paper and have recommended publication in the *Community College Journal of Research and Practice*. We are pleased to accept your paper that will now be forwarded for our copy editing and then for the publisher's copy editing and typesetting processes.

Dear Ken, Congratulations! AIR members reviewed and selected your proposal, *The Impact of Survey Quantity and Quality on Informed Decision-Making*, for inclusion in the 2014 Forum. Due to a large number of high-quality proposals, competition was particularly intense this year, so it is a special honor to be selected. Thank you for submitting a proposal to share your expertise and scholarship with other AIR members. I look forward to seeing you in Orlando, Florida, May 26-30, 2014. Sincerely, H.A. Scott, Associate Director, Association for Institutional Research. [Poster Session and Speaker Session (formerly Concurrent Session)]

Received a personal invitation as follows: Dear Ken, AIR recently issued a call for applications for the 2014-2016 *Professional File* Coordinating Editor. In light of your role as a peer reviewer for AIR Publications, I want to make sure that you're aware of this opportunity. (December 2013)

Dr. Ken Scott – Outstanding Achievement (Amridge University). For his outstanding efforts in both the syllabus creation, especially with an incredibly specific assessment plan for each student learning outcome and an interactive lesson plan that certainly included something for all learning modalities, Dr. Ken Scott was recognized for outstanding achievement, Fall 2013.

Appointed to the Alabama Holocaust Commission, by the Alabama State Board of Education, Alabama Community College System selection: It is recommended "That the Alabama State Board of Education appoint Ms. LeAnn Judah with Lurleen B. - *Amridge University:* QEP & Professional Development Continuous Improvement Agenda:
  Chapter 2: Balancing Professional Work: Teaching, Research, and Service: These three areas are crucial for faculty when considering SACSCOC standards. What was learned through the Compliance Document process is that we do much more than we currently document. This must change! We need an organized approach of relating our services to the mission statement on an annual basis. However, the accrediting body does expect us all to be involved in teaching, research, and service. So let's review Chapter 2: and get a better sense of these definitions and what work you might already be engaged in that seems so routine to you, that you don't even realize it fits the categories.

[1] How can you strategically innovate your training so that your learners develop new knowledge faster, become more deeply engaged, and have a greater impact? Emerging technologies are providing many new and different approaches for designing and delivering training … but where to get started? David Metcalf, the founding director of the Mixed Emerging Technology Integration Lab at the University of Central Florida, will share the latest research and trends about how simulations, mobile, analytics, virtual reality and other emerging technologies are being adopted - now - to improve learning and human performance.

Instructional Courses of Record @ The Level of University and Community College Practice:
UNIVERSITY LEVEL:

Undergraduate:
BS4458 – E-Portfolios in Business Administration (4 Semester Hours):
This is a capstone course that should be taken at the end of the Business program. The program exit exam in the area of the student's concentration (General Business, Information Communication or Information Systems Management) will be administered as part of this course. This course will assist the student in the development of a professional e-Portfolio that is reflective of the student's professional goals, objectives, and personal experiences and that is designed as a valuable tool for career progression. This course will include weekly discussions about professional and ethical issues/topics related to the student's discipline as well as techniques for e-Portfolio development. Prerequisite: Must be within 12 hours of graduation.

CO1403 - Management Information Systems in Business (4 Semester Hours):
A survey and analysis of the use of management information systems in the business environment. Modules cover the basic concepts and terminology of business data processing including computer systems and components, spreadsheets, database management, accounting, Internet applications, and project management. NOTE: Management Information Systems (MIS) is equivalent to and interchangeable with Computer Information Systems (CIS), Information Systems (IS), and Information Technology (IT).

CO2410 – Database Management (4 Semester Hours):
Database Management will involve the understanding, application, and design of database management projects to fulfill business applications. This course will include interactive database team projects and management design of database requirements. The final project will be the analysis, design, and creation of a real-world database project which will require the business leader to use leadership skills to accomplish the project. A research paper is required. Prerequisite: CO 1405.

CO 2412 – Creating a Business Presence on the Web (4 Semester Hours):
This course uses the application language of HTML and XHTML. In this course, students will program multimedia Web pages with hypertext links, tables, frames, forms, cascading style sheets utilizing HTML and XHTML. JavaScript is introduced. HTML, XHTML, and JavaScript are used to design and control dynamic content and layout, control mouse and keyboard events, utilize sound, and manipulate graphics. All work is uploaded and accessible via the Internet. A research paper is required.

CO 2416 – Technology Enhanced Communications I (4 Semester Hours):
This course is designed to provide the student with basic word processing skills. Emphasis is on using software features to create, edit, and print common office communications. Upon completion, the student should be able to demonstrate the ability to use industry-standard software to generate appropriately formatted, accurate, and attractive business communications such as memos, letters, and reports.

CO 2422 – Communicating via the Internet (4 Semester Hours)
Introduces the student to the Internet and provides the student with an excellent opportunity to understand, investigate, and explore the Internet as it is interconnected to Wide Area Networks. The student will learn how to use communications software to access the many resources available on the network. Subjects include: network fundamentals, Internet concepts, electronic mail, file transfer protocol (FTP), Telnet, Internet gophers, firewalls, security issues, and information services. Research papers and an Internet accessible blog are required.

CO2446 - Open Source Business Systems I (4 Semester Hours):
This course is a review of the open source applications and systems *available* to support organizational systems in business, education, and SOHO (Small-Office, Home-Office). Several system functions will be discussed and demonstrated using "capture technology" (e.g. Camtasia Studio). An "entry-level" technical research paper is required in this course. (Note: you will also be presented with the installation of a "dual-boot" process, as well as a virtual system install. Details will be presented in Learning Community I).

CO2447 - Open Source Business Systems II (4 Semester Hours):
A continuation of the fundamentals established in CO2446. This course looks at advanced strategies, details of enterprise systems, and additional techniques/technologies in terms of actual systems installation and applications.

CO 3420 – Managing Business Projects via Technology (4 Semester Hours):
This course introduces the student to the concepts of project management. Using industry standard project management software, students will plan a project, create a project schedule, manage critical tasks and milestones, communicate project information, assign

resources, and manage costs, track progress, and share information with others. Students will be introduced to collaborative projects and project management certification information. A research paper is required.

CO3429 – Web Design/Applications Management (4 Semester Hours):
This course expands on HTML, XHTML, and XML concepts. Students design and create web sites with multiple non-linear pages using industry standard web design applications. Web site management strategies and security issues are also covered. Perquisites: CO2412 and CO3424 preferred but not required.

Graduate:
RS6539 – Research and Evaluation (5 Semester Hours):
A study that provides a broad understanding of types of research, basic statistics, research report development, research implementation, program evaluation, needs assessment, writing a research proposal, and ethical and legal considerations in doing research. Students will develop a research plan incorporating the basic concepts addressed in the course.

COMMUNITY COLLEGE LEVEL:

CIS-172 FUNDAMENTALS OF UNIX/LINUX II:
This course is a continuation of DPT171 and includes advanced features of Unix/Linux. Included in the course are web applications, integrated network configurations, file transfer, server administration, system controls, iptables/firewall to secure Unix/Linux systems, and strategic user-group applications specific to administrative network control.

CIS-264 BUSINESS APPLICATIONS:
Prior programming training is put to use in implementing a practical business application such as accounts receivable, accounts payable, payroll, or other business system. A different application is selected each semester. Instructor will provide student with the necessary data and the student will create all the programs that are necessary to produce the expected results. This course will require outside laboratory time to produce programs for evaluation. Mastery of the language selected for the study, at the desired level, is required.

CIS-268 SOFTWARE SUPPORT
This course provides students with hands-on practical experience in installing computer software, operating systems, and trouble-shooting. The class will help to prepare participants for the A+ Certification sponsored by CompTIA. This is a CORE course.

CIS-269 HARDWARE SUPPORT
This course provides students with hands-on practical experience in installation and troubleshooting computer hardware. The class will help to prepare participants for the A+ Certification sponsored by CompTIA. This is a CORE course.

CIS-270 CISCO I:
This course is the first part of a four-part curriculum leading to Cisco Certified Network Associate (CCNA)
Certification. This course concentrates on the physical part of networking including basic electronics, computer basics, network basics, TCP/IP addressing, number conversions, cabling, and planning. After completing this course the student will be able to: identify the functions of each layer of the OSI reference model; describe data link and network addresses; define and describe the function of the MAC address; explain the five conversion steps of data encapsulation; describe the different classes of IP addresses and subnetting; identify the functions of the TCP/IP network-layer protocols.

CIS-271 CISCO II:
This course is the second part of a four-part curriculum leading to Cisco Certified Network Associate (CCNA) Certification. This course concentrates on router configuration. After completing this course the student will be able to: prepare the initial configuration of a router and enable IP; control router passwords and identification; configure IP addresses; add the RIP and IGRP routing protocols to a configuration.

CIS-272 CISCO III:
This course is the third part of a four-part curriculum leading to Cisco Certified Network Associate (CCNA)
Certification. This course concentrates on LAN design, routing, switching, and network administration. After completing this course, the student will be able to: describe LAN segmentation using bridges, routers, and switches; distinguish between cut-through and store and forward LAN switching; describe the operation of the Spanning Tree Protocol and its benefits; describe the benefits of virtual LANs.

CIS-273 CISCO IV:
This course is the fourth part of a four-part curriculum leading to Cisco Certified Network Associate (CCNA) Certification. This course concentrates on WANs and WAN design. After completing this course the student will be able to: differentiate between LAPB, Frame Relay, ISDN, HDLC, PPP, and DDR; list commands to configure Frame Relay LMIs, maps, and subinterfaces; identify PPP operations to encapsulate WAN data on Cisco routers; identify ISDN protocols, function groups, reference points, and channels; describe Cisco's implementation of ISDN BRI.

CIS-171 FUNDAMENTALS OF UNIX/LINUX I:
This course presents fundamental applications in Unix/Linux. Included in this course are skills development for OS installation and setup, recompile techniques, system configuration settings, file/folder structures and types, run levels, basic network applications, and scripting. Additionally, the course presents security features from an administrative and user consideration.

CIS-280 NETWORK SECURITY:
This course provides a study of threats to network security and methods of securing a computer network from such threats. Topics included in this course are security risks, intrusion detection, and methods of securing authentication, network access, remote access, Web access, and wired and wireless network communications. Upon completion students will be able to identify security risks and describe appropriate counter measures.

CIS-284 DPT INTERNSHIP:
This course is designed to provide the student with an opportunity to work in a degree/program related environment. Emphasis is placed on the student's "real world" work experience as it integrates academics with practical applications that relate meaningfully to careers in the computer discipline. Significance is also placed on the efficient and accurate performance of job tasks as provided by the "real world" work experience. Grades for this course will be based on a combination of the employer's evaluation of the student, and the contents of a report submitted by the student. Upon completion of this course, the student should be able to demonstrate the ability to apply knowledge and skills gained in the classroom to a "real world" work experience.

CIS-291 CASE STUDY IN COMPUTER SCIENCE:
This course is a case study involving the assignment of a complete system development project for analysis, programming, implementation, and documentation. Topics include planning system analysis and design, programming techniques, coding and documentation. Upon completion, students should be able to design, code, test and document a comprehensive computer information system.

CIS-294 SPECIAL TOPICS:
This course allows study of currently relevant computer science topics, with the course being able to be repeated for credit for each different topic covered. Course content will be determined by the instructor and will vary according to the topic being covered. Upon completion, the student will be able to demonstrate knowledge of the course topic through completion of assignments and appropriate tests.

CIS-296 SPECIAL TOPICS:
This course allows study of currently relevant computer science topics, with the course being able to be repeated for credit for each different topic covered. Course content will be determined by the instructor and will vary according to the topic being covered. Upon completion, the student will be able to demonstrate specified skills.

CIS-299 DIRECTED STUDIES IN COMPUTER SCIENCE:
This course allows independent study under the direction of an instructor. Topics to be included in the course material will be approved by the instructor prior to or at the beginning of the class. Upon completion, the student will been able to demonstrate knowledge of the topics as specified by the instructor.

ORI-101 ORIENTATION TO COLLEGE:
This course aids new students in their transition to the institution; exposes new students to the broad educational opportunities of the institution; and integrates new students into the life of the institution.
