

“Moon, Sand, Clouds, and Waves: All in a Day’s Work for God!”

This image was the result of a late evening attempt to capture the crescent moon over the Gulf of Mexico. On some 20 or so previous attempts, with very little light for the camera to hold the moon as the main item to focus, I gave it one final try because by the time this was taken, it was literally dark on the beach. But, as you can see on

the left image, the camera finally figured out what the focal item was and created this wonderful image of the moon. The location where it was taken was on the beach, where sand, waves, clouds, sunset, moon, and God’s Glory shone. Imagine, if you will, how many portraits like these God might create in a timeless Eternity, where such beauty overshadows all pain, hate, tears, and hopelessness! The image on the right was taken moments before the moon above, and in the Heavens, there is a bright star—or planet—that is shining God’s Glory. He knows its name! “He determines the number of the stars and calls them each by name.” (Psalm 147: 4)
