

" Don't feel bad. None of us have leadership qualities."

The Pocket, Socket, Packet, Port Rule

Ken Scott, EdD, CCNA, Security+, Linux+
Why Networks Are Somewhat Abby-Normal.
Self-Afflicted...Affiliated On This One.

The Concept of 'Learning Community Excellence'

If a packet hits a pocket
on a socket on a port,

And the bus is
interrupted as a very last
resort,

And the address of the
memory makes your
floppy disk abort,

Then the socket packet
pocket has an error to
report!

The "Hypothesis" of In-House Employee Leadership Programs

If your cursor finds a menu
item followed by a dash,

And the double-clicking
icon puts your window in
the trash,

And your data is corrupted
'cause the index doesn't
hash,

Then your situation's
hopeless, and your
system's gonna crash.

Why study in-house employee leadership development (ELD) programs?

If the label on the cable on
the table at your house,
Says the network is
connected to the button on
your mouse,
But your packets want to
tunnel on another protocol,
That's repeatedly rejected by
the printer down the hall,

And your screen is all
distorted by the side effects
of gauss
So your icons in the window
are as wavy as a souse,
Then you may as well reboot
and go out with a bang,
'Cause as sure as I'm a poet,
the sucker's gonna hang!

The Leadership "Fork In The Road"

When the copy of your
floppy's getting sloppy
on the disk,

And the microcode
instructions cause
unnecessary risc,

Then you have to flash
your memory and you'll
want to RAM your ROM.

Quickly turn off the
computer and be sure to
tell your mom!
