ACCA PROPOSAL

Please briefly review your proposal information for accuracy. If you are satisfied with your proposal information, please click the 'Send Proposal' button at the bottom of this page to complete the submission. If you are not satisfied, you may click the 'Revise Proposal' button to make corrections.

The Presenter's information is as follows:

Name: Spencer Arington
Title: Instructor - Graphic Communications
Organization: Trenholm State Technical College
Address1: 3920 Troy Highway
Address2: POB 10048
City: Montgomery
State: Alabama
Zip: 36116
Work Phone: 334.420.4392
Cell Phone:
Fax: 334.420.4305 -
E-mail: sarington@trenholmstate.edu

Presenter's Biographical Sketch:

Primary presenter has been in the field of graphic communications for over 20 years, and has developed materials for in-house applications and for business-level applications.

Workshop Track: Teaching and Learning

Presentation Title: The World Wide Web Wow: Web 2.0 Technologies That Significantly Enhance Teaching-Learning
Presentation Length: 60

25 Word Abstract:

This presentation will demonstrate various instructional technologies that will provide significant support to successful teaching-learning activities in the classroom, e.g. Flickr, Google, LiveStream, etc.

Outline:

1. The presentation will be presented in two back-to-back, concurrent 60-minute sessions to provide sufficient coverage of the types of technologies to be demonstrated.
2. An initial overview of the session will be provided in the first 15 minutes or less and include an open-ended discussion to stimulate interest in the topics/technologies to be presented.
3. The technologies will be demonstrated live via the Internet and from remote locations configured prior to the start of the conference. The applications demonstrated include shareware and open-source systems.
4. A sampling list is provided here: Flickr, or image sharing; Google Apps-Office Apps; LiveStream-Video capture and instructional use; Facebook, or networking information/website substitute; MacIntosh iLife interface with web apps; Blogs and PowerPoint apps; and additional shared and free systems/applications;
5. The expected outcome of these two 60-minute, back-to-back sessions is to provide instructors with teaching tools that can enhance and improve the teaching-learning process in the classroom. It is noted that these instructional resources improve the learning outcomes due to the interactive nature of the technologies being utilized; in other words, it is these various technologies that challenge students to learn the material by using technologies that many of them are familiar with or seek to know more about. The presentation will bridge teaching-learning with techniques and technologies that motivate instructors to teach and students to learn.

Audio/Video Required:
LCD Projector/Screen Needed

The Co-Presenter One's information is as follows:

Name: Dr. Ken Scott
Title: Instructor - Computer Information Systems
Organization: Trenholm State Tech College

Co-Presenter's Biographical Sketch:

Co-presenter has been in CIS for over 35 years and in education for 25 years (both two-and-four year), having used instructional technologies of various types/complexities during his tenure.
